Welcome to JITM that has been transforming generation of budding aspirants into accomplished creating a generation of transformational engineers, technocrats, leaders for business and society in unique academic setting, which fosters professional excellence and nurtures core values for fulfilling life. The infrastructure of JITM including classroom facilities, laboratories, workshop, library, computer and internet facilities etc has been adequately developed to meet the latest requirements of technical education. A student will be provided enough opportunity to learn and make an excellent career.

We have succeeded in recruiting some of the best qualified and experienced teachers in various disciplines. Quality education is possible only through a dedicated teacher. We hope, our teachers with excellent teaching capability and reputation will provide a strong academic base for the students. We genuinely boast of recruiting and retaining some of the best faculty in the entire state.

We have taken sufficient care to maintain strict discipline inside the college premises and in the hostels. BPUT academic calendar is followed strictly and the examination are conducted with all sanity. Students are required to attain 100% attendance unless they have a genuine reason to remain absent.

We have evolved a system to involve the guardians and the students in improving the system further. The system will very much look forward to receive support and co-operation from them in building a successful career to every student.

I wish a very bright and successful career for every student
